Summary

In summary, **Harmonyum** is a heavenly science that must be practiced with purity, prayerfulness, and neutrality. The triad of purity, prayerfulness, and neutrality symbolize the linkage to the ultimate heavenly source. Therefore, the Harmonyum practitioner lives a life that is an example of this triad, and remains the purest channel for cosmic energy. In so doing, he/she expands his aura and makes contact with the source of the teachings, thus causing a communion with all heavenly entities. The Harmonyum practitioner always keeps in mind that the purer he/she is the more light the universe grants. He always keeps in mind that purity, prayerfulness, and neutrality are the pure connection to the divine spirit and the symbol of the ineffable presence of the Supreme Principle, God.

With the **Harmonyum** platform for living as his/her guide, the Harmonyum practitioner does not gossip, criticize, or engage in negative speech, for he/she understands that this type of behavior is not aligned with the spirit of light attendant with the practice. Refraining from gossip and criticism are the spiritual tools that protect us from inharmonious vibrations.

When we are pure, prayerful, and neutral, we are isolated from the forces of matter and are helped along the initiators path. In this way, heaven creates the symbol of the divine circle around us and the spiritual chain links us to the initiator as he/she, in turn, is linked to the light. In addition, the luminous beings give us a cloak of mystical armor of the divine spiritual adept and help us dwell within the temple of the soul. With the divine cloak in place, a fortified fence surrounds our aura and protects us. No evil can prosper against it. Harmonyum practitioners who lack neutrality and prayerful purity; who gossip and criticize, cannot and do not truly practice **Harmonyum**.

Life is a process of transmutation. The Harmonyum practitioner develops the necessary character by transmuting the negative aspects of the personality into positive aspects. Practitioners make themselves worthy of the light by their way of life. Living by the Word is one of the working tools of the true Universal Kabbalist and Harmonyum practitioner. Proficiency in the use of the divine Word leads to attunement within the hierarchy of light where these mystical ways originated. Divine spiritual wisdom grants all practitioners of this pure science the opportunity for self reflection and meditation as they pursue the higher path of service. Effective use of the Word, along with the transmutation of negative aspects into positive aspects, raises the Harmonyum practitioner's vibratory frequency. Once his/her frequency has been raised, the Harmonyum practitioner is then responsible for transmuting negative possibilities into positive possibilities in all they come into contact.

Harmonyum is a science that cannot be taught, it can only be transmitted. This is due to the fact that this divine science is not based on merely intellectual learning. Rather, it is a transmission connected to a chain of light. With transmissions, the single most important factor is that the divine Word is delivered through the chain of light to the ear and heart of the listener. In this way, the listener is linked to an assembly of luminous beings who are spiritually devoted to the cause of spreading light and healing on the earth. When transmission occurs in the correct way, purity is assured.
