

## **Business Guidelines for Harmonyum® Practitioners and Bio-Metaphysical Therapists**

“A spiritual and practical understanding of laws governing business”

Harmonyum’s reputation for integrity in the marketplace is a very important asset. Every practitioner bears an important responsibility to safeguard this reputation with clients, colleagues, and the general public by adhering to high professional standards and key principles of business conduct. Since no set of policies and procedures can be all encompassing and since our business is based on informed trust and faith, we as Harmonyum Practitioners must do our best to conduct ourselves in a way that reflects the Twelve Kabbalistic Codes. By holding ourselves to high standards of personal and professional integrity, all of us contribute to Harmonyum’s reputation and business.

It is the responsibility of practitioners in the healing field to gain an understanding of sound business practices. Learning to conduct business from a position of strength, humility, compassion and with a sense of value in Harmonyum’s great potential to heal, provides the practitioner with a sound basis for effective healing, healthy and neutral relationships with clients, and the ability to earn a sound living.

Practitioners must be aware of the Universal law of give and take and the importance of having an equal energy exchange for services. This provides the proper framework for safe and effective healing to occur. Harmonyum is a healing art and science that progressively restores balance in all who receive it. As guardians of Harmonyum, it is important that the conditions surrounding the healing treatment reflect the nature, design and purpose of the healing treatment, which is to bring balance. As such, it is our responsibility to establish, uphold and maintain business practices that are in alignment with Harmonyum itself.

Practitioners must be aware of the great benefit of Harmonyum and the healing that begins to occur once the commitment to receive and perform an appropriate energy exchange occurs. Those who have to save money for the healing and therefore receive it less frequently will still benefit significantly. Conscious sacrifice and commitment begins to shift the client’s consciousness on many levels thus starting the healing prior to the actual treatment.

Practitioners straddle the fine line between allowing for the Universe to provide the necessary funds for the client’s healing and discerning appropriate times to offer discounts.

- As of October 22, 2006 the suggested base cost of a Harmonyum session, as established by the Universal Force International Harmonyum Association is \$150 US (subject to change).
- The Harmonyum Practitioner and Bio-Metaphysical Therapist should inform the client, prior to treatment, of all financial policies.
- Harmonyum Practitioners and Bio-Metaphysical Therapists are strongly encouraged not to provide any discounts for prepaid multiple sessions or to engage in pricing competitions between other Harmonyum Practitioners and Bio-Metaphysical Therapists.

It is our prayer that practitioners remain powerfully guided through their personal spiritual practices to allow them to make all business decisions from a place of compassion, strength and optimism for themselves, their clients and the greater good of all.

Sending you Love, Peace, and Light,

The Universal Force International Harmonyum® Association Team
